Description

Massive reduction from \$1,188,000 US to now asking \$850,000 US

This spacious yacht is not only in perfect condition but has the best layout - imminently practical and usable. Couple it with low engine hours, the highest of specs (including 2 gyro stabilizers) and a keen seller - and you have a recipe for a quick sale. Viewing is a must!

The Ferretti 731 is the expression of the Ferretti style: a highly innovative project born from a revolutionary concept of both outside and inside spaces. Starting from the unusual symmetric perspective of the spaces which dominates both the interior and the flying bridge layout. The ship owner's cabin presents the most important innovations of Ferretti in terms of light and space solution: it has a large panoramic window on both sides allowing an open view of the sea also from the spacious semicircular shower, separated from the bathroom by a sliding door. The huge and comfortable living room and dining area have been designed following the symmetric layout of the boat, with a central position of the TV, double access at the bow area, and centralized pilot house, to make life on board even better and to enhance the brightness of the interiors. The external layout permits a more generous living area on the rear deck with an opening spoiler bench which offers its guests a comfortable experience to live the sea in absolute tranquillity.
