Description

This remarkable luxury yacht has been designed and developed to bring to the seas yet another high speed cruising vessel that adds luster to the already glorified V Class yachts from Princess.

The Princess V72 luxury yacht is powered by twin Caterpillar engines or twin MTU engines that enables this gorgeous vessel to attain a top cruising speed of 34 knots and 37 knots depending upon the type of engine configuration.

To ensure that the passengers get the very best view of the open seas, Princess Yachts has provided the V72 with a spacious rear cockpit as well as wide side decks. Furthermore, the V72 also comes with foredeck seating area. To provide the ultimate sea experience, this incredible vessel has been given a swim platform that can be lowered down into place via a hydraulic lift. The exterior of this remarkable vessel is adorned with teak wood, including the cockpit bar adding further elegance to an already exquisite vessel.

The interiors of Princess V72 are heavily inspired from the company's 105-foot M Class Princess yacht, where in the vessel comes with red, hand-stitched Italian shagreen leather that adorns the dressing tables in the owner's and VIP guestrooms. The staterooms have been given stall showers as well as plenty of natural lighting. The Princess V72 luxury yacht is fully air conditioned and is packed some of the most hi-tech standard instrumentations.

Fuel Capacity: 10400 L

Water Capacity: 2000 L
